

BulaBioBrew Grow is a natural liquid foliar fertiliser made with beneficial microbes, which is rich in calcium and balanced with phosphate, nitrogen and potassium and micronutrients. It is a chemical-free product designed to maximise plant growth and enhance nutrient balance.

Benefits

BulaBioBrew Grow stimulates the growth of root and leaf biology and promotes nutrient balance which:

- Further supports plant natural defenses to pest and disease attack by increasing carbohydrate release through the plant roots which increases diversity of the root biology and reduces the risk of root disease and pathogen attack.
- Increases the plant's natural brix (sugar levels), which further protects the plant from pests and disease.
- Maximises growth and yield potential.
- Improves efficiency of any fertiliser applied to the soil.

Nature's energy flow from sunlight to carbohydrate is a complete system. The energy released by **BulaBioBrew Grow** opens the natural pathways of plants to produce higher quality nutrition, thus **BulaBioBrew Grow** stimulates and moves soil and plants toward a healthy, productive balance.

Maximises plant growth & nutrient balance and ideal for most plants

Analysis

N	P	K	Ca	S	Humic Acid	Fulvic Acid
1.5%	1.5%	2%	1.5%	0.1%	2.8%	0.5%

Application

Crop	Rate Ltr per Acre	Comment
Sugar Cane, Pasture, Rice (Dryland)	8L per Acre (e.g. for 1 Acre use 8L of product diluted in 80L water)	Apply directly on the plant from two leaf stage to late tillering. Dilute 1L of product to 10L of water.
Dalo, Cassava, Ginger, Pineapple	8L per Acre (e.g. for 1 Acre use 8L of product diluted in 80L water)	Apply directly on the plant from two leaf stage to late tillering or up to pre-flowering. Dilute 1L of product to 10L of water.
Horticulture (e.g. lettuce, cabbages, herbs etc)	15L per Acre (e.g. for 1 Acre use 15L of product diluted in 150L water)	Apply directly on crops to stimulate crop growth and leaf production. Dilute 1L of product to 10L of water.
Vines, Trees (e.g. beans, tomatoes, passionfruit, pumpkin, citrus, okra, eggplant etc)	15L per Acre (e.g. for 1 Acre use 15L of product diluted in 150L water)	Apply directly on vines/trees when the flowers start to form fruit. Dilute 1L of product to 10L of water.

DO NOT USE IN FULL SUN OR DURING THE HOTTEST PART OF THE DAY.

Available in 1000 litre, 20 litre, 5 litre & 1 litre
