

BulaBioBrew Soil is a natural liquid fertiliser rich in healthy, beneficial soil biology and plant food, including carbon and humates. It is a chemical-free product designed to promote diversity and balance in soil biology.

Benefits

BulaBioBrew Soil stimulates soil biology by:

- Increasing the conversion of organic matter into humus, which in turn improves the water holding capacity of soil.
- Introducing beneficial microbes for the natural control of pathogenic microbes.
- Promoting a balanced and diverse nutrient flow that improves crop vigor, enhances crop yield potential and increases crop resistance to disease.
- Increasing crop drought tolerance.
- Improving soil tilth and assisting in the breakdown of hard soils.
- Helping ensure healthy pH balance and unlocking nutrient flows to plants.

BulaBioBrew Soil enhances the effectiveness of other fertility programs, especially in conjunction with natural products such as agricultural lime.

Analysis

N	P	K	Ca	S	Zn	Cu	Humic Acid	Fulvic Acid
0.5%	0.05%	1.5%	0.5%	1.5%	2%	1%	2.8%	0.5%

BulaBioBrew Soil can be tailored to meet individual soil test results to include additional trace nutrients. **BulaBioBrew Soil** is ideal for all soil types in broad acre and intensive farming. It is also used in pasture and garden applications.

Application

Crop	Rate L per Acre	Comment
Sugar Cane, Pasture, Rice (Dryland)	8L per Acre (e.g. for 1 Acre use 8L of product diluted in 80L water)	Apply to moist soil prior to planting or during planting. Dilute 1L of product to 10L of water.
Dalo, Cassava, Ginger, Pineapple	8L per Acre (e.g. for 1 Acre use 8L of product diluted in 80L water)	Apply to moist soil prior to planting or during planting. Dilute 1L of product to 10L of water.
Horticulture (e.g. leafy greens, tomatoes, beans etc)	10L per Acre (e.g. for 1 Acre use 10L of product diluted in 100L water)	Apply to moist soil before plants begin to flower. Dilute 1L of product to 10L of water.
Vines, Trees (e.g. passionfruit, pumpkin, citrus, okra, eggplant etc)	15L per Acre (e.g. for 1 Acre use 15L of product diluted in 150L water)	Apply to moist soil from when the plant is flowering until it starts to fruit. Dilute 1L of product to 10L of water.

DO NOT USE IN FULL SUN OR DURING THE HOTTEST PART OF THE DAY.

Available in 1000 litre, 20 litre, 5 litre & 1 litre DELIVERY FIJI WIDE
