

Fiji n Sea

Sargassum Sister © 2024 TFFC. ALL RIGHTS RESERVED.

Fiji n Sea is pure Fijian Sargassum Seaweed harvested from inshore lagoons and naturally digested into a rich, chemical-free nutrient liquid fertiliser that improves plant health and maximises growth.

Benefits for Farmers

Fiji n Sea improves plant nutrition by balancing soils and increasing brix (plant sugar) levels.

- Enhances strong seedling root development.
- Increases flowering and fruit production and the shelf life of harvested crops.
- Increases plant brix levels which leads to better resistance against diseases, pests and frost.

Benefits for Fiji's Environment

By using **Fiji n Sea** farmers are helping address an environmental problem in Fiji. Historic poor agriculture and waste management practices in Fiji have led to nutrients running off from the land and into the sea, and this in turn has caused blooms of sargassum in inshore lagoons. Combined with the overfishing of seaweed-eating reef fish, sargassum has become invasive. The Fertile Factory is utilizing this seaweed and supporting community-owned coastal businesses, including women and youth groups, to implement management practices to sustainably harvest sargassum and build back coral reef health and inshore reef biodiversity.

**Boosts growth and increases yield,
increases brix levels**

Analysis

N	P	Ca	S	Mg	K	Se
0.75 %	0.15 %	1.4%	0.82 %	1.0%	1.2%	0.09 ppm
Na Cl	Cu	Mn	B	Zn	Fe	Co
3.0%	6 ppm	61.5 ppm	70 ppm	30 ppm	800 ppm	12 ppm

Alginates 600-700 g/kg

The above analysis refers to **Fiji n Sea**.

Application

Crop	Rate L per Acre	Comment
Sugar Cane, Pasture, Rice	5L per Acre (e.g. for 1 Acre use 5L of product diluted in 50L water)	Apply at any time throughout the growing cycle. Dilute 1L of product to 10L of water.
Dalo, Cassava, Ginger, Pineapple	5L per Acre (e.g. for 1 Acre use 5L of product diluted in 50L water)	Apply at any time throughout the growing cycle. Dilute 1L of product to 10L of water.
Horticulture (e.g. leafy greens, tomatoes, beans etc)	8L per Acre (e.g. for 1 Acre use 8L of product diluted in 80L water)	Apply at any time throughout the growing cycle. Dilute 1L of product to 10L of water.

Note: Do not use any acidic or acidic-based products. Always check compatibility by mixing jars before adding them to your spray tank.

DO NOT USE IN FULL SUN OR DURING THE HOTTEST PART OF THE DAY.

**Available in 1000 litre, 20 litre, 5 litre & 1 litre
DELIVERY FIJI WIDE**
